PsychiatryOnline.com Adds Gabbard's *Treatments of Psychiatric Disorders* Leading Authorities Address Cutting-edge Treatments of Major Mental Illnesses

Arlington, Va. – *Gabbard's Treatments of Psychiatric Disorders*, 4th Edition, will debut as part of the core offerings at www.PsychiatryOnline.com in January 2008. More than 160 authorities share insights gained from firsthand experience in a state-of-the-art text that covers all major treatments in psychiatry linked to specific disorders.

The text employs a pluralistic approach that includes all major treatment modalities and avoids focusing exclusively on preferred approaches. Scrupulously reviewed and edited to consolidate treatment information most needed by readers, the book is organized along the lines of the *Diagnostic and Statistical Manual of Mental Disorders – Fourth Edition Text Revision (DSM-IV-TR)* to cover the entire spectrum of conditions, from cognitive, psychotic, and mood disorders to eating disorders, sleep disorders and disorders of impulse control.

“Making *Gabbard's Treatments* available in the PsychiatryOnline portal is an innovation that will benefit practicing mental health physicians, professionals and students alike,” said the book’s editor, Glen O. Gabbard, M.D., Brown Foundation Chair of Psychoanalysis and Professor of Psychiatry at Baylor College of Medicine. “One can now access the latest cutting-edge treatments for all the major psychiatric disorders along with the content of DSM-IV-TR and other resources on the same Web site. It’s truly a ‘one-stop shopping’ phenomenon now.”

The Gabbard title joins other vital content from American Psychiatric Publishing, Inc. (APPI): *DSM-IV-TR*, differential diagnostic advice and case examples; the American Psychiatric Association’s (APA) Practice Guidelines (including new guidelines and revisions as they are released by APA); the *Textbook of Clinical Psychiatry* (with interactive self-assessment); *Essentials of Psychopharmacology* (with interactive self-assessment); *Manual of Clinical Psychopharmacology*; medication information handouts for patients; and *The American Journal of Psychiatry* and other journals published by APA and APPI. The customized PsychiatryOnline.com search and browse technology allows quick targeting of clinical information and searching across all resources from a single search box.

Usage at PsychiatryOnline.com has almost quadrupled since this time last year, approaching 2 million page views per month. Visit www.PsychiatryOnline.com for more information and to subscribe. APA members receive substantial discounts on subscriptions.

About American Psychiatric Publishing, Inc.

American Psychiatric Publishing, Inc. (APPI) is the world’s premier publisher of books, journals, and multimedia on psychiatry, mental health and behavioral science. APPI offers authoritative, up-to-date and affordable information geared toward psychiatrists, other mental health professionals, psychiatric residents, medical students and the general public. Visit APPI at www.appi.org.

About the American Psychiatric Association:

The American Psychiatric Association is a national medical specialty society whose more than 38,000 physician members specialize in the diagnosis, treatment and prevention of mental illnesses including substance use disorders. Visit the APA at www.psych.org and www.HealthyMinds.org.
